Towards a New Community

No.17

Beyond the Nation State:

What Does It Mean?

1. Broadening the possibilities of humanity through the form of an open community which is unrestricted by local concepts, while moving toward a diverse and inclusive community that respects and values rich, diverse individualities and cultures.

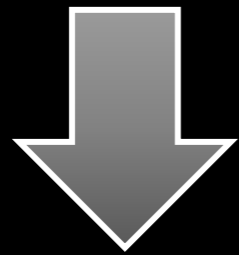

⇒ Gradually graduating from “old walls” that were set up by humanity itself one by one

⇒ Ultimately creating a united world

2. Not only merely integrating nations within the existing system of nation states, but also moving beyond (graduating) the system and values of the past, and shifting to the new paradigm that is needed in the world of today.

⇒ Graduating from “internal walls” and “systemic walls” created by the formation of nation states

3. Not rejecting the notion of nations, but instead a process of gradual change(graduating) which better reflects the original role of nations.

Protecting human life and resources, and allowing people to live more freely, comfortably, peacefully, and happily.

Beyond Nation-State
