

WeCENT

Weather, Climate and Environmental information for Tourism

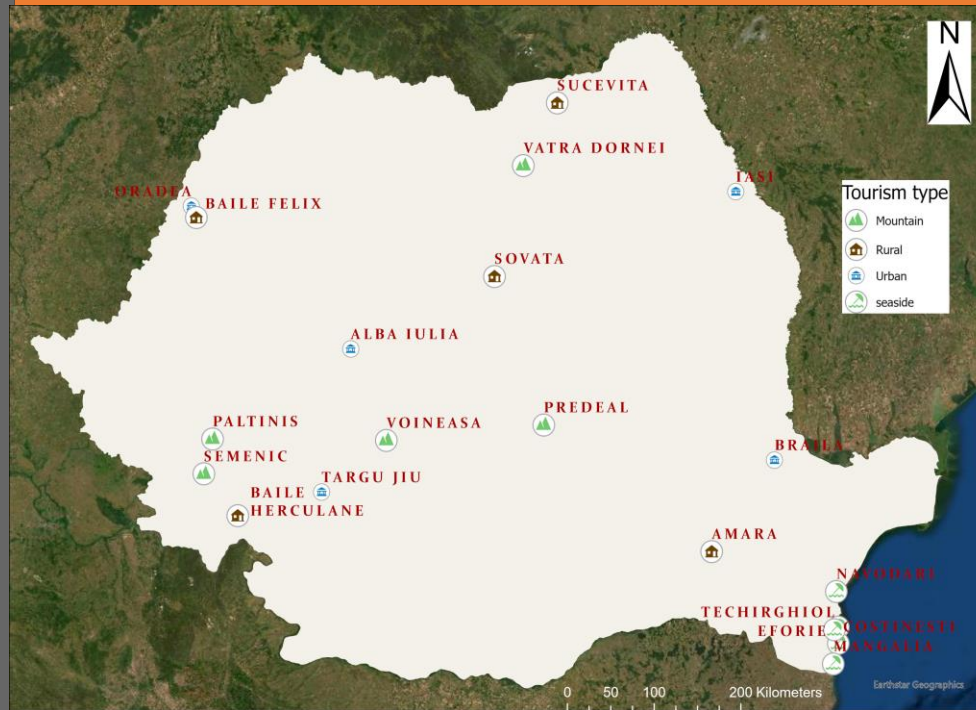

WeCENT is a research project funded by the European Commission through a Marie Skłodowska-Curie Individual Fellowships under grant agreement No. 887544 and implemented at Ca' Foscari University of Venice (www.unive.it)

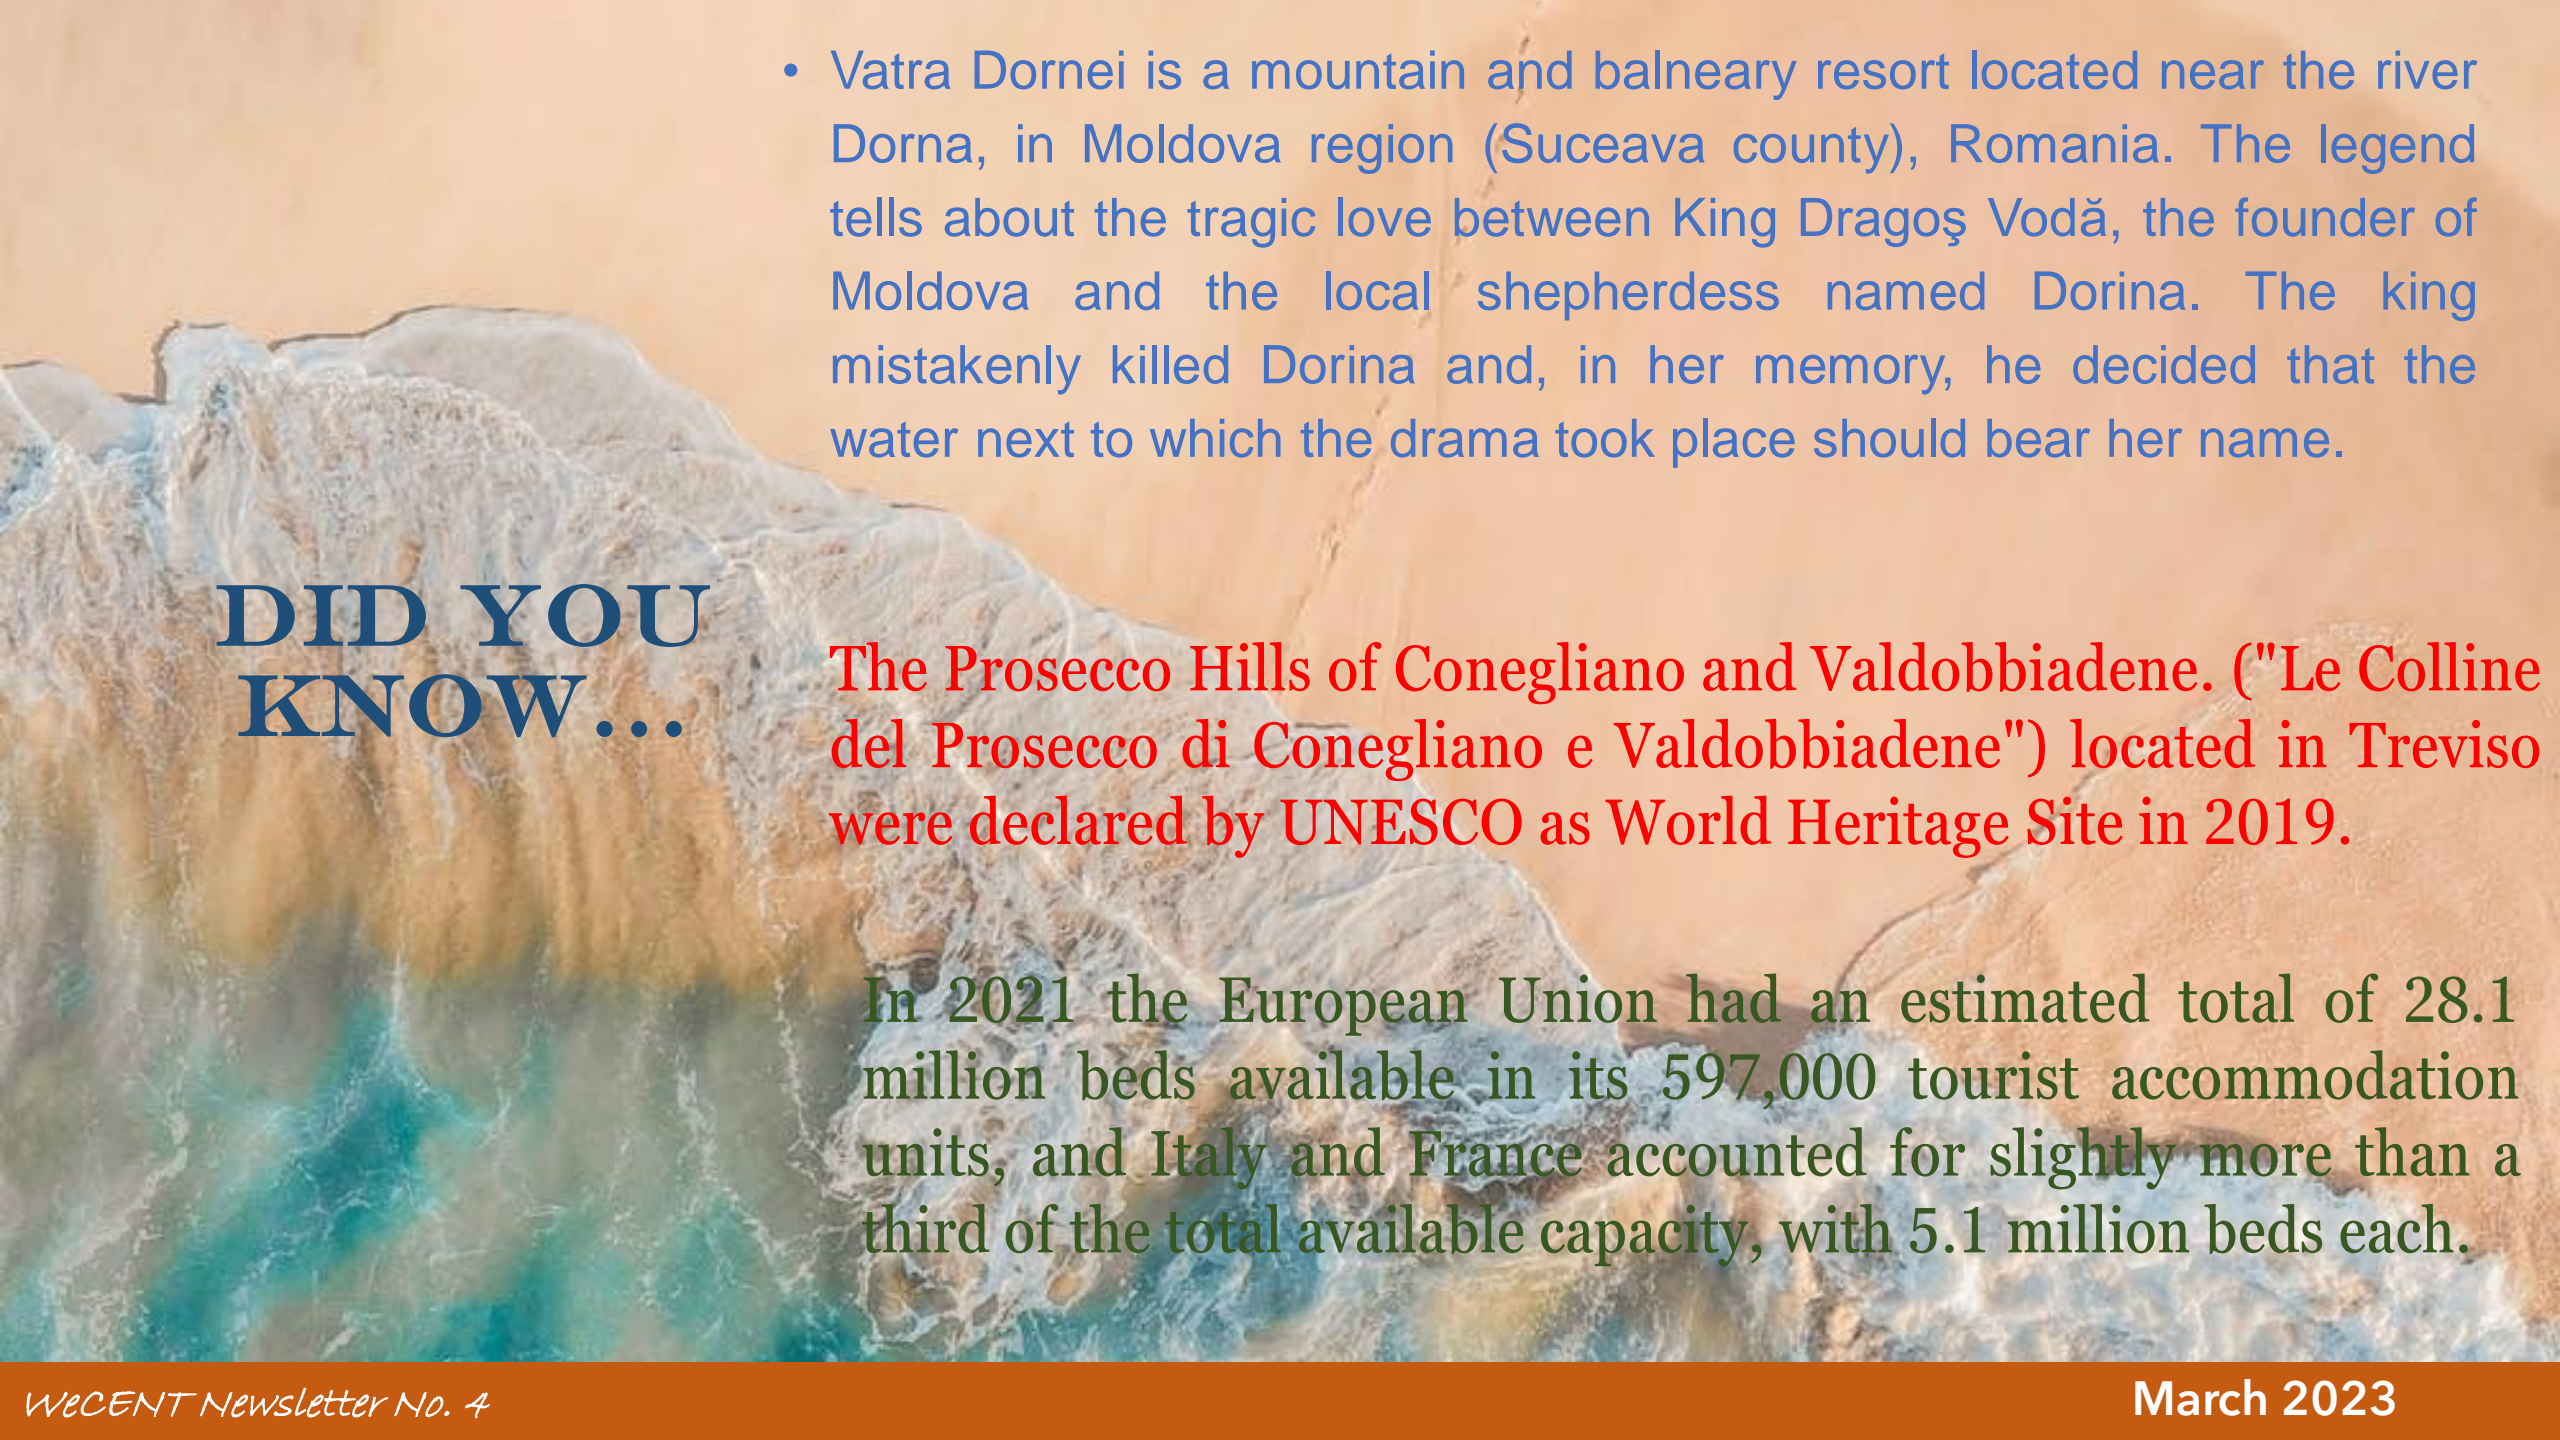

WeCENT aims to bring some of the latest scientific information on climate and environment closer to the daily usage, by tailoring this information for direct and easy use for tourists.

WHERE TO GO IN VACATION?

We build and provide free tourism-oriented information for 40 touristic destinations in Romania and Italy.

- 
- Vatra Dornei is a mountain and balneary resort located near the river Dorna, in Moldova region (Suceava county), Romania. The legend tells about the tragic love between King Dragoș Vodă, the founder of Moldova and the local shepherdess named Dorina. The king mistakenly killed Dorina and, in her memory, he decided that the water next to which the drama took place should bear her name.

DID YOU KNOW...

The Prosecco Hills of Conegliano and Valdobbiadene. ("Le Colline del Prosecco di Conegliano e Valdobbiadene") located in Treviso were declared by UNESCO as World Heritage Site in 2019.

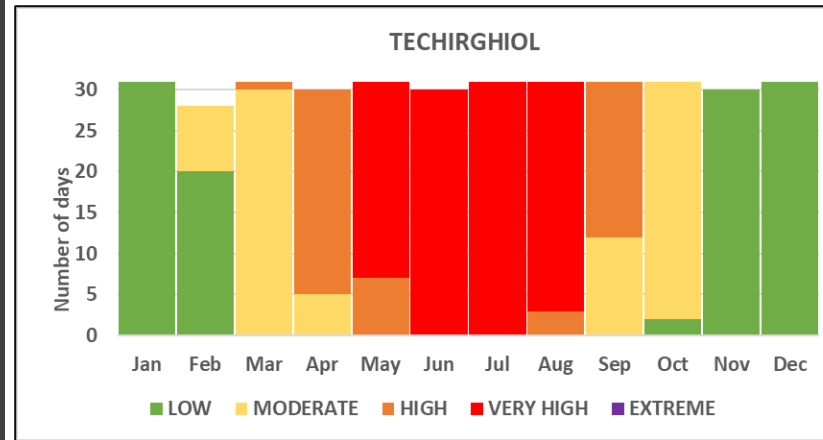

In 2021 the European Union had an estimated total of 28.1 million beds available in its 597,000 tourist accommodation units, and Italy and France accounted for slightly more than a third of the total available capacity, with 5.1 million beds each.

We have

NEW PRODUCTS

Here are some examples!

SUNBURN RISK

LOW – The clear-sky UV index has values below 3. **No protection is required**, you can safely stay outside.

MODERATE – The clear-sky UV index has values between 3 and 5. **Protection is required**, like the use of sunscreen or wearing hat and light, comfortable clothes.

HIGH – The clear-sky UV index has values between 5 and 7. **Protection is required**. You should seek shade during midday hours or use sunscreen and wear hat and light clothes.

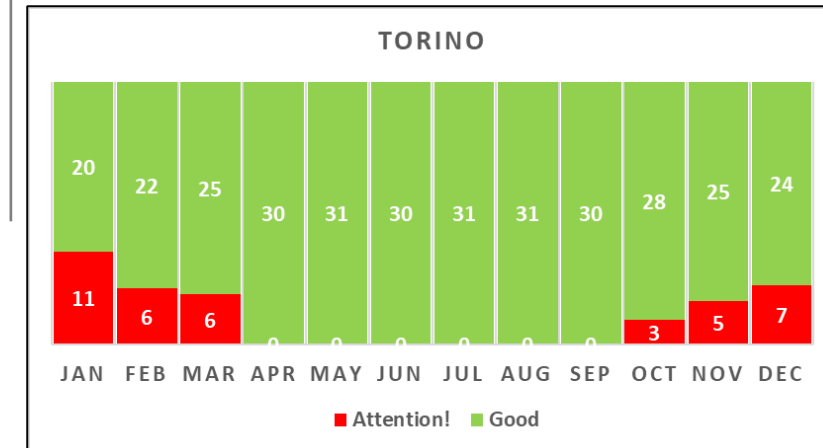

VERY HIGH – The clear-sky UV index has values between 8 and 10. **Extra-protection is required**. You should avoid being outside during midday hours. Make sure you seek shade! Shirt, sunscreen and hat are a must!

EXTREME - The clear-sky UV index has values above 11. **Extra-protection is required**. You should avoid being outside during midday hours. Make sure you seek shade! Shirt, sunscreen and hat are a must!

AIR QUALITY

Good – The PM10 concentration level is below the daily alert threshold. There is no significant health-related risk for most people if staying outdoor.

Attention! – The PM10 concentration level is above the daily alert threshold. People with respiratory issues and small children should limit their outdoor activity.

SOON!

EVENTS

25-27 May 2023

**Tourism and Rural Space
in National and International Context**

Vatra Dornei, Romania

<https://www.tarsconference.com/>

TARS Conference was born out of the need of Romanian researchers to assess and promote the economic scientific research portfolio on tourism, to argue and substantiate its Romanian development strategies, and to provide European and international best practices.
